

# robots/reboot

## instructions

### objective

Grow trees to fill the atmosphere with as much oxygen as possible to win!

### robot movement

Move your robot along the white lines. Plant in any surrounding triangle. Avoid the black stones!

Seeds are in short-supply and scattered on the planet's surface.

### how to start

Roll the die to get energy points. Answer a question if you roll a "?"

- ◆ Every step takes 1 energy unit
- ◆ Picking up a seed takes 1 energy unit
- ◆ Planting a seed takes 1 energy per triangle

Initially, your robot can carry 1 seed at a time.

## instructions (continued)

### planting

Once seeds are planted, they instantly become trees. Plant 5 trees in one spot and you have a forest worth 10 oxygen points. Otherwise, each tree is worth 1 oxygen point.

If your opponent plants in the same spot, you are unable to form a forest.

It takes 2 energy units to remove another team's tree.

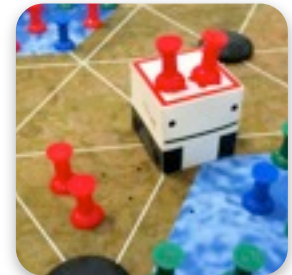

### upgrades

Each time you create a forest, your robot can carry 1 more seed at the same time.

You can upgrade to a maximum capacity of 4 seeds.

- ◆ Picking up seeds takes 1 energy unit regardless of number
- ◆ Planting seeds takes 1 energy unit per triangle
